-

PROJECTS

African AI Network Website

Tech Stack: React + Vite, sanity CMS

Contributed to the Revamp of African AI Network Organization Website Ensuring user friendly experience.

What I Implemented: User Authentication flow, landing Page and All the Subsidiary Pages. Integration restful APIs to the frontend and Integrating Sanity CMS to the Frontend.

Link: africanainetwork.com

African AI Network LMS System

Tech Stack: Nextjs, Tailwind css, shadcn

Contributed to the revamp and development of the AAN Lms system to support user learning experience. Developed modules such as chat system, referral system etc.

Link: lms.africanainetwork.com

Yohpal Web

Tech Stack: Next.js, TypeScript, Firebase

Contributed to building the web platform for my previous company. The platform is a video streaming application for content creators.

What I Implemented: User Authentication, User Profile, Video Interaction, Caching, Redis Integration for caching, CDN Integration

Link: yohpal.com

Realtors Web

Tech Stack: React, Next.js, Tailwind CSS, ShadcnUI, React Framer Motion

Built a landing page for a construction company. Displays company services, description and contacts while ensuring mobile first view for mobile phone users.

What I Implemented: Framer Motion Animation, Mobile Responsive/Mobile First View

Link: <https://realtors-web.vercel.app/>

JavaScript Weekend Projects

Tech Stack: Vanilla JavaScript, HTML, CSS

This project contains seven projects that were done in one weekend to test my skills in JavaScript and Open-Source API integration.

What I Implemented: Weather App, Digital Clock, To-Do App, Calculator App, Number Guess and a Quiz App
